

MY POLITICAL GOALS

1) Unite all young, primarily European-descended, radicals together online. To put an end to echo-chambers and **destroy** the left/right divide. On an individual level, not institutional, we should be able to work in unison toward shared, select goals.

2) Fight against further technological progress. This affects all of us and would benefit mankind in both the short and the long term. Together, we can fight against generative AI from both the right and the left. Leftists hate deepfake pornography of women because it's sexist. Right-wingers hate it because it's degenerate. Banning generative AI is easily feasible within our lifetime. We must focus on one concrete goal at a time, THEN move on to the next one.

It is true, that banning generative AI can be seen as a reformist action that could be reversed by governments in the future. It's not about the legal impact of what we accomplish, but the change in mainstream discourse we create to get there.

This channel is dedicated to goal 1.
